

Spinal Mobilization Therapy

Practitioners - Increase your effectiveness,
Increase your Practice, Increase your Income

Massage Therapists * Chiropractors * Physical Therapists * Nurses

What is Spinal Mobilization Therapy?

SMT is a safe and gentle state-of-the-art technique for alleviating neck & back pain, spinal misalignment, range of motion limitations and postural problems. SMT addresses and corrects the source of the problems, not just the symptoms. Practitioners will learn the protocol to stretch and tonify spinal attachments resulting in increased and long term healing. With SMT you can increase your **practice** and therefore your **income**, while minimizing the wear and tear on your body.

"I have treated more than 300 people with SMT.

Patients are amazed at the amount of relief they get with their neck & back pain. Many of my clients come in just for SMT. Using SMT before a massage makes the muscles relax before we even begin and it is much easier for me.

Clients and chiropractors have reported huge success with their chiropractic adjustments after SMT. Patients love it!"

Shawna Loy, Massage Therapist

Dr. Sage Rainbow is a holistic practitioner employing a variety of techniques and training to treat the individual as a whole. Chiropractic, Reiki, Therapeutic Touch and Eastern Medicine influences and blends to create a system of health for all. Dr. Sage shares his vast storehouse of over 40 years knowledge with other practitioners and the public through his workshops.
